

Grupa 3

Extreme programming

Extreme programming emphasizes simplicity, courage and communication. The main characteristics of this methodology is TDD and pair programming.

The goal of extreme programming is to produce high quality code using simple means, with fair communication inside of the team and with strong relation with the client.

Roles in a team:

- Mateusz Zaborski - customer
- Marta Rutkowska – manager
- Grzegorz Krzysiak - developer (architect and designer)
- Sebastian Majewski – developer (tester)
- Ewa Zielińska - developer
- Alex Makulski – developer

Our team will organize our work using tools such as Trello (available at bitbucket task management plugin) and Google Sheets for tracking each pair work. We will change pairs in which we work according to our needs.
